

TAC Energy is a Dallas, TX based independent wholesale distributor of refined petroleum products. Our customers include branded and unbranded gasoline and diesel retailers, industrial users, transportation, trucking, government, utilities, mining, construction, plus any other commercial user or reseller of fuel. Our mission is not to just sell customers a commodity, but to *ENERGIZE* their fuel. This is accomplished by bringing added value services to our customers, such as our in-house 24/7 Supply & Logistics call center, fuelBASE Price Assurance tools, Inventory Intelligence monitoring & purchasing, customized online tools development and the *passion for service* that all TAC brands are known for. With an annualized fuel volume approaching one billion gallons, TAC Energy has a vast terminal supply network and regional sales offices that span the continent.

TAC Energy's parent company, Truman Arnold Companies, (TAC), began in 1964 as a Texarkana, TX based Conoco distributor. From these origins in fuel distribution, c-stores, terminaling and wholesale marketing & products trading, TAC Energy has evolved into one of the nation's largest independent distributors of refined products. Consistent growth, positive financial results and a diversification of operations have led Forbes magazine to rank TAC as one of the top private companies in the United States.

In addition to TAC Energy, TAC's other divisions include TAC Air with its network of fixed base operations across the nation, Keystone Aviation providing world-class aircraft charter, maintenance, sales & management and TAC Investments, which manages the company's portfolio of capital assets.

With annual revenue of more than \$3 billion and a diversified collection of divisions, TAC's reputation is to take what others are already doing then do it like no one else does. But ultimately, it's *A Passion for Service* that sets TAC apart.
